

*Coinco's iris™ telemetry and cashless devices offer industry leading features and innovative technologies specifically designed to maximize your profits in today's vending environment.*

### **KEY BENEFITS**

- Enables your machine to accept cashless payments by connecting them to the secure network.
- Works with several network options to ensure connectivity (2G, 3G, CDMA).
- Communicates via Ethernet, USB, bluetooth and WiFi to meet specific location requirements.
- Provides 24/7 remote data monitoring to take the guesswork out of inventory and restocking.
- Interfaces with most backend Route Management Systems via the NAMA VDI industry standard.
- Installs in seconds with a unique magnetic mounting system.
- Drives optional iris Window LCD color display to enhance consumer interaction.

**Focus on your profits with iris™**
